DIY TruCurve 1 Flex Channel Plaster-In LED System

By PureEdge Lighting

Description

The DIY (Do-It-Yourself) Plaster-In Flexible Channel is an innovative and highly efficient 24VDC system that blends seamlessly into drywall, becoming part of the architecture. The TruCurve 1 DIY system makes creating complex configurations and organic shapes simple by specifying the degree and radius of the curve you are designing. Multiple runs of channel mount flawlessly together, providing smooth and glare-free general illumination. Curved channels are ordered by length and flexed into position. The 1.2 inch links may be added or removed with a screwdriver, no cutting required. Sold in 1 foot increments with LED strip sold separately) available in Static white from 2400K through 4000K, Warm Dim (27D or 30D), Pro Dim (27PD and 30PD), Tunable White (2K6K or 27K6), Dynamic RGB, RGBW in 2000K, and TruColor RGBTW Color Changing RGB with Tunable White 1500K-6500K. All components sold separately. NOTE: See LED strip for power supply options.
