Flexia Wall / Ceiling Light

By Artemide

Description

The Flexia Wall / Ceiling Light takes its name from papiroflexia, the Spanish word for origami, in reference to the fixture's folding, wing-like section. One half of the fixture is an acoustic panel made of recycled PET fabric to absorb sound waves and reduce distracting background noise. The other half of the pendant is an illuminated LED panel that provides a pleasantly diffused, uniform distribution of light. Flexia can be installed as a flat square or folded during installation, allowing for a variety of dynamic looks. Flexia's versatile combination of acoustic, lighting, and decorative functions will transform any environment.

Specifications
