A716R Exhaust Fan with Heater and Light

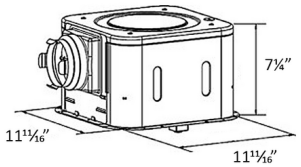

By Aero Pure

Description

The A716R Exhaust Fan with Heater and Light combines a low-noise bathroom ventilation fan with a powerful, efficient heater and a light, providing immediate warmth when you step out of the shower while quietly clearing excess moisture. Four anti-blast infrared heat lamps provide maximum warmth throughout the bathroom. Two or four lamps can be turned on for varying heat levels. The fan, heater and light may be wired separately, and a 4-function wall switch is included. The four heat lamp bulbs and a 60W incandescent light bulb are also included. This IC-rated fixture is suitable for new construction or remodel applications and fits with 2 x 8 inch joists. Articulating expandable anti-vibration brackets and a connector for 4 inch ducts are included. The fixture has rust-proof steel motor housing, a built-in backdraft damper and thermal shutoff. It cannot be installed directly over a tub or shower enclosure. UL listed when used with GFCI branch circuit wiring. Note: Requires a 15 amp circuit.
