Nalum Linear Pendant

By Ingo Maurer

Description

The Nalum Linear Pendant evokes the motion of waves and reflections of light off water's surface with its stunning, wave-shaped glass tube. The inner, textured tube is surrounded by an outer glass cylinder which houses the light source that directs light both upwards and downwards. The inner tube can be rotated to experiment with different angles of reflection from the light source. As a playful detail, small figurines of surfers can be placed on the inner glass.

Specifications
