TruTrack Trim Magnetic 2-Circuit Recessed Track 24V

By PureEdge Lighting

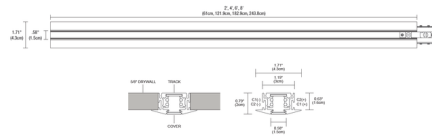

Description

TruTrack Trim is a 2-circuit, recessed track system that recesses within any 5/8 inch drywall, tile and millwork flat surface to blend seamlessly within the space. The trim flange and slot cover are paintable, allowing TruTrack Trim to become one with the architecture. Recessed TruTrack Trim Channel is available in 2', 4', 6' and 8' lengths, with the ability to be cut in the field. The two-circuit system, requiring two 24V remote power supplies, allows for independent switching and dimming. An opaque plastic slot cover is included with TruTrack Trim channel to hide recessed track slot and may be painted to match the ceiling. Required remote power supplies, power feed (End, Center, L, T or X), end cap(s), track components, and track heads are sold separately. Note: See track head for required power supply.
