Verge Wall TruColor RGB+Tunable White Plaster-In LED System

By PureEdge Lighting

Description

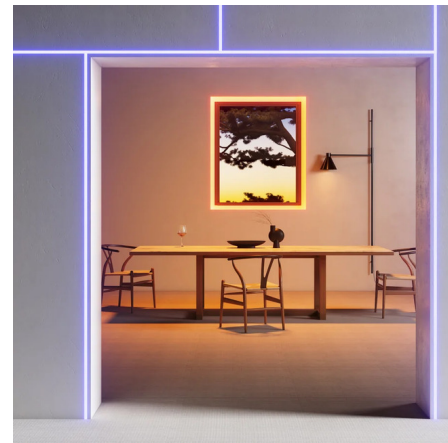

Verge Wall TruColor RGBTW is a slim, plaster-in aluminum channel with 4 inch paintable aluminum backer plate. Verge Wall creates and highlights the transition space where two drywall surfaces join together while emitting ambient illumination. PureSmart TruColor technology uses five channels of tunable LEDs composed of RGBTW Red-Blue-Green and Tunable White (1500-6500K), giving customers access to the warm glow of sunset (1500K-2400K golden hour) to the pure white light of the mid-day sun (5700K) and everything in between. Verge Wall is sold in 5 foot increments and may be field cut to any length. Available in 5W5 (5 Watts RGB+5 Watts Tunable White) up to 20 feet and 5W7 (5 Watts RGB+7 Watts Tunable White) up to 12 feet. Required PSBR-96W-24V power supply and optional accessories sold separately. Product is built to order. Included Components: Junction Box with Adjustable Mounting Bars, Backer Plate, Verge Wall Channel(s), Drywall Screws, LED Strip, and Lens(es).
