Azou Modular Wall / Ceiling Light

By kdIn

Description

The Azou Modular Wall / Ceiling Light is part of a modular lighting system that allows multiple points of light to be connected by a slender cable which traces a path along the wall and ceiling. Each light features a circular shade in marble or onyx stone that a warm and welcoming halo of light towards the wall. Up to 14 Azou lights can be connected and mounted on either the wall or ceiling, allowing for endlessly customizable arrangements. Each light includes 98 inches of cable to connect between fixtures. Azou requires a driver, sold separately. The Plug-In Driver Kit can be used to easily plug the Azou arrangement into an outlet, and it includes a dimmer switch on the cord. The Azou Driver can be installed in a remote location, or combined with the Azou Canopy to mount the fixture onto a standard US junction box.
