Geo Pendant By Capital Lighting

Description

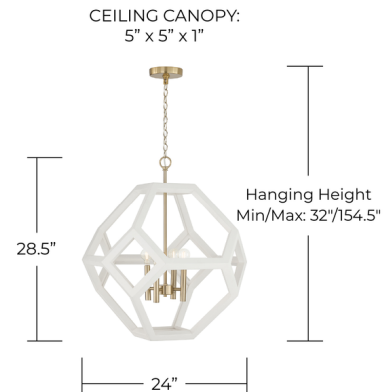

The Geo Pendant showcases a striking open-frame design that blends modern structure with natural elements. Crafted from mango wood, its multi-faceted form creates a sculptural presence while allowing light to pass through its geometric framework. At the center, candle-style sockets are suspended within the dimensional frame, adding depth and visual interest. The layered construction and angular lines give the piece a bold yet balanced look, making it a distinctive focal point in a variety of interior settings.
