Whirl Dichroic Pendant

By Tom Dixon

Description

The Whirl Dichroic Pendant is an experiment in mirrored reflections with a hypnotically spiraling polycarbonate shade that produces a myriad of dazzling reflections. Inspired by the bold patterns of the Op Art movement, Whirl makes a strong statement in any space. This version of the Whirl Pendant is paired with a dichroic lens over the integrated LED light source to divide light into its constituent parts of the spectrum and add a color, iridescent shimmer to the design. Standard 120V and ELV dimmable.

Shown in silver / silver whirl
