Bloom Wall Light

By Nova of California

Description

The Bloom Plug-In Wall Sconce is a graceful expression of sculptural lighting, ideal for modern spaces that need soft, ambient light without permanent installation. Designed as part of the iconic Bloom Collection, this wall sconce revives Mervyn Weitz's original 1976 concept inspired by underwire bra construction - transforming steel wire and translucent fabric into luminous, organic forms. This plug-in sconce casts a warm, glowing light perfect for reading nooks, bedsides, or hallways. The integrated inline dimmer allows for easy control of brightness, while the plug-in design makes setup simple and renter-friendly. Inline dimmer lets you control light levels with ease.

Shown in weathered brass / white

Specifications
