Holonzki Plug-In Wall Sconce

By Ingo Maurer

Description

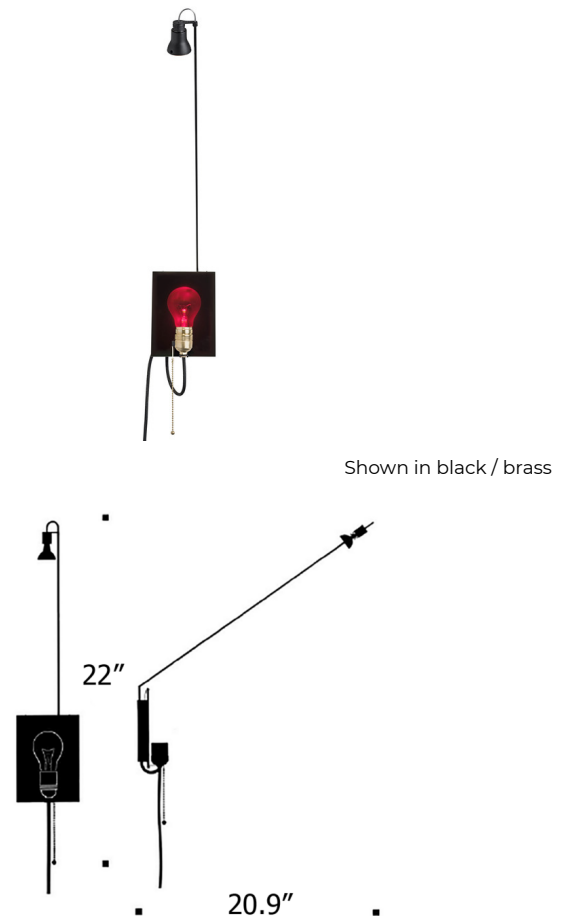

The Holonzki Plug-In Wall Sconce will add a magical touch to an interior with its dazzling optical illusion. At first glance, the Holonzki appears to consist of a simple bulb set atop a brass socket with a pull-chain switch. However, a closer look reveals that the light bulb is actually a hologram image that is not physically there! The hologram is revealed when Holonzki's light source, located at the end of a slim stem, is switched on and vanishes when switched off. The color of the hologram cannot be controlled directly, but its color will vary from red to green depending on the temperature and humidity of its surroundings. As much of a decorative sculpture as it is a lamp, Holonzki is sure to add an enchanting touch to any interior. Note: Direct sunlight and nicotine can reduce the lifespan of the hologram. Holonzki is not suitable for use in damp or outdoor locations.

Specifications
