Cruiser Ceiling Fan

By FARO Barcelona

Description

The Cruiser Ceiling Fan is a versatile fixture with a modern aesthetic. The DC motor is reversible so it can create a cool atmosphere in the summer or circulate warm air that accumulates near the ceiling in the winter. Cruiser is available with or without an LED light source. The included LED is CCT-selectable and can be set to 2700K / 4000K / 6500K color temperature to create different lighting atmospheres. A remote control is included to choose between 6 fan speeds and set the timer. For wall control, the fan is compatible with 0-10V systems (the LED lamp is non-dimmable).

Shown in matte white
