Apogee Duo Pendant

By hollis+morris

Description

The curvilinear shape of the Apogee Duo Pendant is inspired by the moon's elliptical orbit around Earth. Taking its name from the apogee, the moon's furthest point from Earth along its orbit, the pendant's frosted acrylic discs evoke the image of the moon in its gibbous phase. Apogee's interesting arrangement of simple shapes creates an attention-grabbing fixture with a sculptural presence.
