MicroTrack Groove Suspension 48V Straight 1-Circuit Channel

By PureEdge Lighting

Description

The MicroTrack Groove 1-Circuit Suspension is a 48VDC suspension mounted channel with a larger profile engineered to house PureEdge Light Bars seamlessly within the track alongside track heads. For a refined architectural look, a slot cover is supplied with track channels for hiding the 12 AWG copper busbars and mounting screws. Straight channels are available in 44 inch and 92 inch lengths with the ability to be cut in the field. Curved channels are available in 12 and 20 degree radius options. Track heads easily attach to the track (no screwdriver required). Channels include 12 foot suspension cables, two joiner connectors, end caps, two straight connectors, and two opaque plastic slot covers to conceal the 12AWG copper busbars.Offered with an end or center power feed. Use up to two 96 watt remote power supplies on the same line voltage circuit. A remote 48VDC power supply and power feed are required and sold separately. Track components and track heads are sold separately.
