Flindt 120V Outdoor Bollard

By Louis Poulsen

Description

The Flindt 120V Outdoor Bollard emits a wide, downward directed, glare-free light. The light source rests at the top inside the asymmetric carving on the side of the bollard, where the gradient serves as a reflector that softens the light and forms a pleasant organic shape on the ground below. Flindt is perfect for lighting outdoor pathways while also providing a modern, decorative accent. Flindt is available with an Anchor base to be fastened to a concealed mount within the pole's base, or a round Baseplate to be anchored to the surface. The 43.3 inch size is also available with a Direct Burial base for burying into the ground. All options include a 15W LED driver housed within the body of the fixture.

Specifications
