Petra Indoor/Outdoor Color-Select Wall Sconce

By CWI Lighting

Description

Elevate your lighting design with the Petra Integrated LED Wall Light, a sophisticated blend of raw texture and precise architectural form. This luxury fixture is designed to make a statement in both interior and exterior environments, from grand hallways to modern entryways. The fixture features a minimalist Sand Black frame that serves as a bold, matte canvas for the luminous handcrafted glass. This thick, artisanal glass is characterized by its unique texture and internal seed details, ensuring that each piece is a one-of-a-kind work of art. When illuminated, the glass captures and refracts light, creating a shimmering, multi-dimensional effect that is as much a sculpture as it is a light source. Equipped with cutting-edge 5 CCT selectable technology, the Petra indoor-outdoor wall light gives you complete control over the mood of your space. You can easily switch between five distinct color temperatures ranging from (2700K, 3000K, 3500K, 4000K, 5000K). It allows you to perfectly match the lighting to your home's unique materials and architecture.

Shown in sand black / artisanal glass
