Tavolo A Dischi Dining Table

By Gubi

Description

Originally designed by Italian architect Carlo De Carli in 1963, the Tavolo A Dischi Dining Table combines structural innovation with expressive materials. The table's base is made of birch plywood discs of varying sizes surrounding a metal core to create the illusion of a curve. It supports a round tabletop which is clad in high gloss American Walnut veneer for a rich, warm look. The foot of the base features a steel ring in burnished brass finish for a warm, understated accent.
