Ellipse Wall Light

By Sonneman

Description

Inspired by the grandeur of a cathedral organ, the slender shades of the Ellipse Wall Light extend vertically in a layered composition. As illumination radiates from each end of the three tubes, it forms soft beams that animate the wall with depth and shadow. The asymmetrical design introduces an organic twist to this symphony of light, while customizable left/right alignment allows for symmetry when installed as pairs. Note: Remote transformer does not fit in canopy.
