## Urchina Pendant

By Moooi

### Description

The Urchina Pendant translates the symmetrical shape of sea urchins into a constellation of light that appears to hover in mid-air. An array of slender carbon fiber rods support polycarbonate diffusers that emit a gentle glow. A downward light in the center of the fixture provides general illumination in addition to the ambient, upward glow. Urchina is available in a variety of sizes to suit any space, from an intimate living room to a large lobby or public space.

Shown in black
