Flat Reading Wall Sconce

By Bover

Description

The Flat Reading Wall Sconce began as a hotel-room reading light: a discreet wall fixture with a precise, comfortable, well-controlled beam meant to support a restful night. Its rectangular body, with rounded corners and beveled edges, sits just off the wall for an airy look, reading as an architectural detail that blends in as naturally as a wall finish. With its clean lines, understated presence, and glare-free direct light, Flat goes well beyond reading. It also serves as general wall lighting or as a guide light along stairs and hallways, integrating with the architecture without calling attention to itself.
