Raise Lighting

DESCRIPTION

Made with the same technique and materials used in early Edison bulbs, these generate a warm glow at a low light level. Each style has a distinct filament pattern when illuminated. The European standard 60 watt bulbs are appropriate for U.S. fixtures and burn at a gentle 20 watts due to the lower U.S. voltage. Filament Bulbs burn less energy and will last longer than standard 60 watt bulbs. Cord and plug not included.
