Revelite AL Picture Light

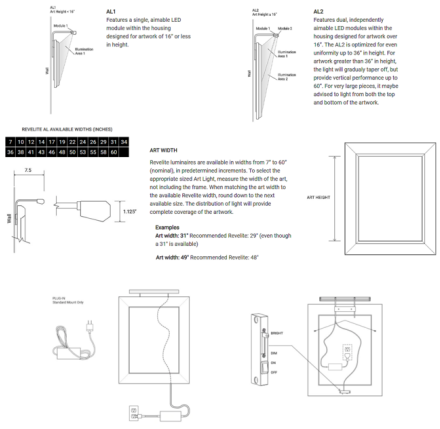

By Revelite

Description

The Revelite AL is a revolutionary picture light that is custom built and tuned at Cerno's facility in Laguna Beach, California. This fixture evenly illuminates the entire surface of a painting using an extremely high color rendering light source. The uniformity and quality of light emitted is not achievable with standard off-the-shelf fixtures available today.Revelite AL1 features 5 watts per foot with 470 lumens max per foot, while AL2 features 10 watts per foot with 940 lumens per foot at max brightness. All of these unprecedented attributes are embodied in an unobtrusive fixture profile that almost disappears when one views the art. Includes a plug-in power supply with a cord length of 9 feet. Supplied with a control switch for on/off and dimming adjustment that may be discreetly located behind artwork. 0-10V dimming only. Available for art 7 to 60 inches wide and up to 36 inches tall. If art is larger than 60 inches, multiple fixtures can be used.

Shown in brushed aluminum

Specifications
