Drylight Outdoor Wall Sconce By Masiero

Description

Drylight Outdoor Wall Sconce is available in a Nickel finish with Methacrylate or Crystal Droplets. The chandelier arms are made from a special plastic material derived from the automotive industry, which is characterized by its extreme robustness and resistance to atmospheric agents. Above all, we have chosen a compound that does not turn yellow or crystallize, even if subjected to high temperatures and continuous exposure to sunlight. The center piece on the other hand, is made from a special glass fiber-filled Nylon-based plastic solution, which is elastic and at the same time particularly resistant to general and mechanical stress. The metal components have been subjected to specific galvanization and the lamp covers have been made from borosilicate. Glamour moves outdoors with the first collection of outdoor lighting fixtures inspired by Venetian tradition. Allow yourself to be seduced by the stupendous atmosphere of Drylight, a revolutionary technology. No limits, no concerns. Let it rain. Two 10 watt, 12 volt JC type G4 base Halogen lamps are required but not included. 15.74 inch width x 13.77 inch height x 11.81 inch depth. Includes a low voltage transformer. IP65 rated for Wet Locations.
