Calumet 8W 9 Deg Outdoor Wall Light

By Artemide

Description

Accentuate your outdoor walls with focused elegance using the Calumet 8W 9 Deg Outdoor Wall Light. This durable and aesthetically pleasing fixture features a sleek cylindrical body with a reinforced glass diffuser and watertight silicone gaskets, engineered for resilience in outdoor environments. Designed for down light distribution, it casts a precise beam downward, creating a sophisticated lighting effect on your wall. The direction of the light beam can be adjusted to achieve your desired illumination. Built to last, it undergoes a rigorous 3-stage outdoor treatment (Nanotechnologies, antioxidant primer, and polyester paint) and is crafted from die-cast aluminum with a choice of a crisp Grey White or sophisticated Anthracite Grey finish. Equipped with PMMA lenses with a narrow beam angle, it delivers targeted and impactful light. An integrated LED light source provides efficient illumination, with selectable warm or cool color temperatures. UL Listed and IP65 rated, this fixture is suitable for wet locations, making it an excellent choice for highlighting architectural details, pathways, or creating a subtle glow on any exterior surface with a distinct architectural and contemporary flair.
