Molla Outdoor Wall Light

By Artemide

Description

The Molla Outdoor Wall Light is an innovative and highly adaptable luminaire designed to provide precise, bi-directional light distribution for architectural exteriors. This versatile fixture offers two distinct beam spreads to cater to diverse lighting needs: a broad 90-degree large beam, achieved through a combination of a monochromatic LED light source with a meticulously designed reflector, and a focused 8-degree narrow beam, obtained by combining an LED source with a high-performance projector.The projector component is skillfully composed of a body in reinforced polymer and high-quality PMMA lenses. Both the tempered and silkscreened light diffusing glasses are siliconed flush with the lighting cap, ensuring a clean aesthetic and superior watertightness. Installation is secure via a bracket in folded steel sheet that attaches to the wall, to which the fixture is then fastened with two screws. The Molla Outdoor Wall Light is treated with a robust 3-Stage Outdoor Treatment Nanotechnologies, Antioxidant Primer, and Polyester paint ensuring exceptional durability and resistance to harsh outdoor conditions, making it an ideal choice for sophisticated facade illumination.
