Nuda Bilateral Outdoor Floor Light

By Artemide

Description

The Nuda Bilateral Outdoor Floor Light delivers sophisticated, dual-direction illumination for outdoor environments, perfect for enhancing pathways, driveways, or facade lighting. This comprehensive system includes the lamp head, a supportive pole, and a robust ground mounting plate, designed for seamless integration into any landscape. Light is diffused beautifully through a polycarbonate UV and shock-resistant satin finish diffuser, ensuring a gentle, widespread glow that withstands the elements. The elegant support pole is crafted from extruded aluminum, undergoing a chromate treatment and painting process for superior durability. A sturdy mounting plate, made of folded, welded, and painted steel, features pre-drilled holes for secure ground fixing. Precision steel screws and a silicone seal gasket guarantee watertight performance. This fixture benefits from a comprehensive 3-stage Outdoor Treatment Nanotechnologies, Antioxidant Primer, and Polyester paint for exceptional resilience. Constructed from aluminum with a painted Grey White finish, and featuring an integrated LED light source, this IP65-rated fixture is suitable for wet locations and comes in two heights, providing effective bilateral lighting with a minimalist aesthetic.

Specifications
