Cadmo Floor Lamp

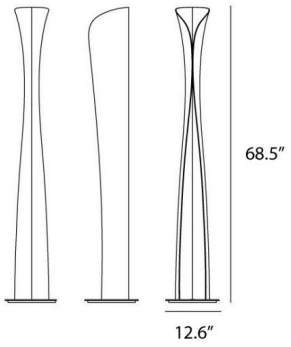

By Artemide

Description

The Cadmo Floor Lamp is a bold, sculptural luminaire that orchestrates a sophisticated interplay of indirect and diffused light, creating a dramatic yet inviting atmosphere. This imposing fixture features distinctive steel panel screens that elegantly conceal the light sources, allowing light to softly emanate upwards and along its striking vertical aperture.The Cadmo integrates a powerful combination of LED light sources for both indirect and diffused emission, offering the convenience of separate switching for each. A dual switch on the cord allows for independent operation of these two light sources, providing exceptional control over your lighting environment.Supported by a stable weighted metal base in mirrored stainless steel, the lamp boasts a durable aluminum body with an exterior available in a classic black or white painted finish, and an interior finished in white to optimize light reflection. It includes integrated 33-watt (indirect) and 7-watt (direct) 120-volt LED light sources. The Cadmo Floor Lamp is a powerful and artistic statement piece for any modern living space.
