

BRAND Hunter Fan

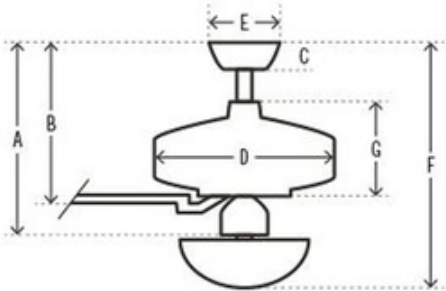

DESCRIPTION

HFC 72 inch Ceiling Fan is designed to significantly improve air circulation in large spaces like vaulted living rooms, pole barns, and industrial buildings. The large blades do the work - it turns at lower speeds than a standard ceiling fan yet moves much more air because of its long 72 inch aluminum blade span. With this fan, you get the air circulation you need to regulate room temperature and keep heating costs down without the wind and breeze created by smaller fans. As a special feature the HFC-72 includes 6 blades and can be installed as a 3 or 6 blade fan. The fan is also damp rated for use in covered porches, patios, and sunrooms. Available in a Matte Black motor with Black aluminum blades or Matte White with Matte White aluminum blades. Includes 3 speed stepped wall control and 11 inch downrod. CFM: 8926. Airflow Efficiency: 92. Electricity Use: 97 watts. Rated for damp locations. 72 inch width x 21 inch height. ETL listed, damp locations.
