Empatia Table Lamp

By Artemide

Description

The Empatia LED Table Lamp is an exquisite luminaire designed to provide beautifully diffused ambient lighting, creating a warm and inviting atmosphere on any surface. Its base is crafted from durable painted die-cast aluminum, ensuring stability and a refined finish that complements its elegant design. The lamp's defining feature is its magnificent hand-blown Clear Frosted glass diffuser, available with a pristine White finish. This artisanal glass is central to its design, ensuring a soft, even glow that minimizes harshness and enhances visual comfort. The delicate craftsmanship of the glass makes each piece subtly unique. Available in three sizes, each Empatia Table Lamp includes an integrated LED module to provide efficient illumination tailored to different spatial needs. This fixture offers adaptable, elegant lighting for bedside tables, consoles, or any surface where a harmonious blend of craftsmanship and diffused light is desired. A convenient sensible touch dimmer on the base provides effortless control over brightness levels.
