Acqua Metal Ceiling Fan with Light

By Matthews Fan Company

Description

The Atlas Fan Acqua Metal Ceiling Fan is thoughtfully designed to resemble the molecular structure of water, Earth's most precious resource, featuring fluid lines and quiet axial rotation. The fan heads can be pivoted 180 degrees which changes the axial rotation speed to achieve optimal air movement. The body is made of cast aluminum and heavy stamped steel, and the blades, also constructed of metal, are encased in decorative cages that carry vintage and industrial style. A replaceable LED light provides ambient illumination. A hand-held RF remote control is included and enables fan on/off, 3 speeds, forward and reverse, and light on/off. Optional accessories are sold separately.

Specifications
