Meteorite Wall / Ceiling Light

By Artemide

Description

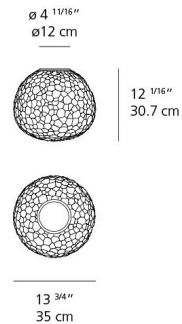

The Meteorite Wall / Ceiling Light is an artistic statement piece, transforming any surface into a canvas for luminous beauty. Its defining feature is a magnificent hand-blown double-layer artist glass diffuser, crafted through a complex succession of molding, frosting, sandblasting, and etching techniques. This meticulous process results in a truly unique, organic texture reminiscent of a celestial body, making each fixture an individual work of art. When illuminated, the intricate glass diffuses light exquisitely, creating a soft, inviting glow that minimizes glare and infuses your space with an ethereal ambiance. Designed for versatile installation, this fixture can be mounted on either the wall or ceiling, allowing you to create captivating focal points or provide broad, ambient illumination. The Meteorite Wall / Ceiling Light requires one medium base bulb (not included), giving you the flexibility to choose your preferred light source. It makes a substantial yet elegant presence, perfect for adding sculptural beauty and warm light to contemporary interiors.
