

BRAND

Legrand Adorne

DESCRIPTION

The Adorne Whisper Wi-Fi Ready Switch Remote Control is an innovative cross between a traditional toggle and a paddle switch which appeals to designers for its classic lines and fluid, whisper-soft motion. Its simple intuitive programming and ease of installation does not require any master controls, special wiring, or complex training courses. This device communicates with Legrand's patented RF technology. The Whisper Switch Remote Control requires a Wi-Fi Ready master switch and the LC7001 The Hub, sold separately, and can work with its iOS and Android mobile device APP. Its simple intuitive programming and ease of installation does not require special wiring, or complex training courses. Provides a 700W load rating in 1-gang installations, 600W in 2-gang, and 500W in 3-gang. Your Wi-Fi lighting project only needs one Wi-Fi ready switch or dimmer to get started. Get the rest of the components and scale up your project from there. A remote-controlled switch allows you to control a load, such as a lamp, from a location that is not electrically connected to that load. Available in Magnesium finish. Requires Adorne wall plate, sold separately.
