Cariddi Outdoor Spot Light

By Artemide

Description

The Cariddi Outdoor Spot Light provides precise and powerful illumination in a compact, versatile design for a multitude of outdoor applications. Its adaptable mounting options allow for installation on walls, ceilings, or at ground level, ensuring effective, direct emission lighting wherever needed. Finished in a contemporary Anthracite Grey, this durable fixture houses an adjustable, high-performance LED module built to withstand outdoor conditions. The Cariddi offers exceptional control over light direction: it swivels 180 degrees in either direction on its base, and its tilting bracket provides an additional 130 degrees of rotation in either direction. This ensures you can meticulously aim the light to highlight specific elements of your landscape or architecture. Featuring a 28 or 41 watt 120-volt LED module, you can choose between a concentrated 20-degree or a wider 40-degree beam angle. Select a 3000K (a warm white light) or 4000K (a more neutral, whiter light) color temperature to complement your outdoor aesthetic. With its efficient performance and an IP65 rating for wet locations, the Cariddi is a reliable solution for bringing focused, adaptable light to your exterior spaces.

Specifications
