Hex Cell Louver Adapter

By Hunza Lighting

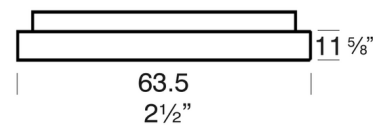

Description

The Hex Cell Louvre Kit consists of an extension component for the luminaire body, a Hex Cell Louvre insert and an extra clear lens and gasket (O-ring). Available in 316 Stainless Steel, Copper, or powder coat Bronze or Black finish. The main purpose of the Louvre accessory is to protect the eye from the sideways glare emitted from the lamp filament, without dramatically changing the look of the luminaire. When a Hex Cell Louvre is fitted to a fixture it does not affect the IP rating of the luminaire. Optional lens options available, sold separately. IP66/IP68 rated for wet locations.

Shown in stainless steel
