

BRAND Hunza Lighting

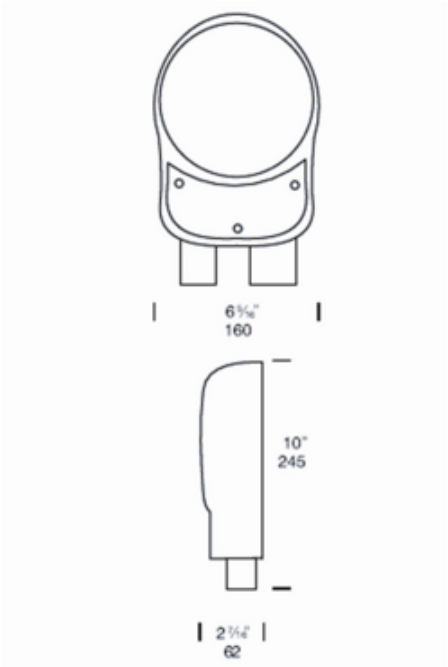

DESCRIPTION

The Wall Mount Transformer (100W, or 200W) is a compact above ground, waterproof unit designed to provide 12 volt power for HUNZA low voltage luminaires in landscape lighting installations. Encapsulated toroidal transformer suitable for 120/240 volt 50/60Hz operation. Wall Mount Series transformers have a black, glass-reinforced, UV stable nylon case which provides durability, UV resistance and a low surface temperature. Electrical components are fully encapsulated in the casing for protection against weather and irrigation systems. A key feature of this transformer is multi-tap output providing the choice of 12, 13 or 14 volt secondary output allowing for greater flexibility in compensating for voltage drop on long cable runs. Features thermal protection for the primary side of the transformer with fuse protection for the secondary. 1 inch and 1.25 inch conduit entries to allow for different cable. Dimmable with low voltage leading or trailing edge dimmers, sold separately.

Shown in: Black

SHADE COLOR	N/A
BODY FINISH	Black
WATTAGE	100W
DIMMER	Low Voltage Magnetic
DIMENSIONS	6.31"W x 10"H x 2.43"D
LAMP	N/A
SPEC #	HUZ483723
