**INSTALLATION OF MINI ELECTRICAL BOX**

- Place box against structural member (joist or stud) and secure through 3/8" diameter holes on side with drywall screws (by others). Be sure to use two screws. Mini Electrical box must be flush with drywall when installed.
- Example:** If using 5/8" drywall be sure bottom of electrical box extends past structural member 5/8" to be flush with dry wall when installed.
- If attaching Mini Electrical box between structural members attach blocking in appropriate position and secure Mini Electrical box to blocking per step 1.
- Attach conduit to supplied knock outs.
- Note: Mini Electrical box is not suitable for through wiring.**
- Install transformer in electrical box if supplied.
- Wire and finish per instructions supplied with light fixture.
