

DESIGNER Tom Dixon  
BRAND Tom Dixon

DESCRIPTION

The Stone Surface Light comprises a halo hollowed from white marble mounted on a tube with a central floating ball in the form of a brass-crowned bulb. The stone is cut to the thinnest possible depth, so it appears to be semi-translucent, emphasizing its patterned surface and casting illumination on to the surface below. UL/cUL listed. Damp listed when used as a wall light. Designed in London.
