Tolomeo Micro Wall Light with J Bracket

By Artemide

Description

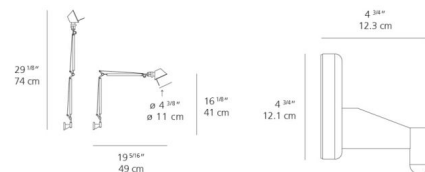

Bring precise and adaptable illumination to your walls with the Tolomeo Micro Wall Light with J Bracket (hardwire). This elegant fixture features a fully articulated arm and body structure crafted from extruded natural anodized aluminum, offering durability and a sleek, modern aesthetic. The signature joints and tension control knobs in polished die-cast aluminum, alongside robust stainless steel tension cables, ensure fluid movement and precise light positioning. The diffuser, made of anodized aluminum, provides focused light and is impressively tiltable and rotates a full 360 degrees on the lampholder, giving you complete control over light direction. Designed for a permanent and seamless installation, this wall light utilizes a Type J bracket suitable for direct wire to a junction box, providing a clean, professional look with no visible cords. It requires one 60-watt, 120-volt G16.5 candelabra base incandescent lamp (not included). A convenient on/off switch is included for easy operation. With a 4.4-inch diameter shade, 16.1-inch height, 19.9-inch depth, and an impressive 29.1-inch fully extended arm, this compact fixture offers substantial reach. UL listed for safety, customers praise its minimalist design and effective task lighting for smaller areas. Perfect for reading nooks, bedside lighting, or as accent illumination in a hallway, the Tolomeo Micro Wall Light with J Bracket offers a blend of contemporary and transitional design with precise functionality.
