Tolomeo Micro Plug In Wall Light By Artemide

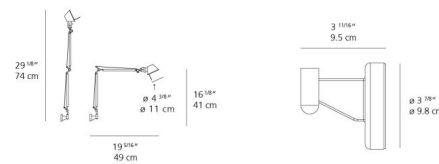

Description

Experience versatile and precise illumination with the Tolomeo Micro Plug In Wall Light with S Bracket (cord and plug). This highly adaptable fixture features a fully articulated arm and body structure crafted from extruded natural anodized aluminum, providing superior durability and a sleek, modern aesthetic. The signature joints and tension control knobs in polished die-cast aluminum, alongside robust stainless steel tension cables, ensure fluid movement and precise light positioning. The diffuser, made of anodized aluminum, provides focused light and is impressively tiltable and rotates a full 360 degrees on the lampholder, giving you complete control over light direction. Designed for convenient installation, this wall light utilizes a Type S bracket suitable for wall surface mounting with an integrated cord and plug, offering immediate functionality without hardwiring. A convenient on/off switch is included for easy operation. This fixture offers two lamping options: an Incandescent (INC) version requiring one 60-watt max 120-volt G16.5 candelabra base bulb (not included), or an energy-efficient integrated 5-watt 120-volt LED light source for modern illumination. With a 4.4-inch shade width, 16.1-inch height, and 19.3-inch depth, this compact fixture delivers impressive performance. UL listed for safety, customers consistently laud its flexibility for renters and excellent focused light. Perfect for bedside reading, task lighting in a small home office, or as an adaptable accent light, the Tolomeo Micro Plug In Wall Light embodies contemporary design with practical versatility.
