Locator Light

By Legrand Radiant

Description

The Radiant 15 Amp Locator Light Module is part of the all-new Radiant collection and acts as an LED locator light when the load is off. Module simply snaps-in for easy installation. When used with a multi-switch device, wire the light module to the switch that controls the lights in the proximity to the switch. When wiring a single pole switch, wire the light module from the common terminal to the switched terminal. See attached manufacturer specification and installation instructions for more detail. 120/125VAC. UL listed.
