

Berenice Table Lamp W/ No Reflector

Designer: Alberto Meda

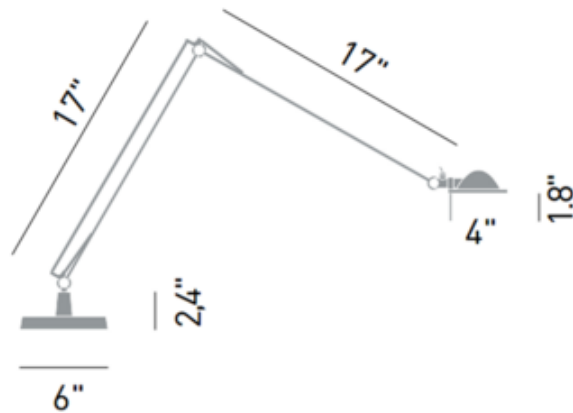

Description:

The Berenice Table Lamp is a light that allows for easy directional orientation in space. The fluid movement of the jointed arms and the 360 degree rotation of the head make it possible to adjust the direction of the beam. Poised on a sturdy, stable base, Berenice adapts to any situation with versatility and precision. The many different models respond to a wide range of functional needs. Available in black or aluminum finish. Reflector sold separately.
