Momento Small Pendant

By Wonderglass

Description

The Momento Pendant, designed by Nao Tamura, is inspired by the moment when a clinging bead of water, in quiet orb-like suspension, becomes a droplet. The droplet reflects its surroundings while gathering light within. There is a moment when molten glass transforms from liquid to solid. This instant of transition is accompanied by an emission of beautiful light. Momento freezes that moment of ephemeral beauty and turns it into a source of light. The elliptical shadow, folding over itself, captures the glassmaker's spinning technique. It is a gentle ripple of light just like when a droplet hits the surface of still water.
