# Orsa Multi Light Pendant

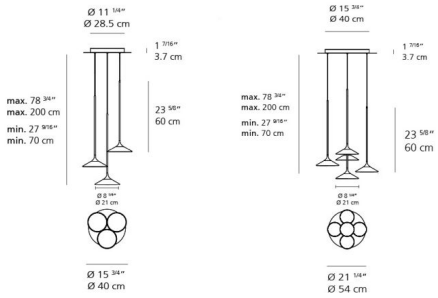

By Artemide

## Description

The Orsa Multi Light Pendant is the embodiment of precision and minimalist elegance, transforming light into a captivating volume that floats effortlessly in your space. This remarkable fixture features multiple individual Orsa pendants, each meticulously pared down to its essential elements to maximize the visual impact of its illumination.Slim metal stems elegantly flare out at one end, forming the integrated heat-sink and housing for the advanced LED light source. A UV bonded glass cover then seamlessly contains this source, with its ingenious design ensuring that the LED itself remains entirely invisible. The result is a stunning optical illusion: each pendant appears as a pure, floating disk of light. The exquisite glass takes its unique shape from the focused output of the LED, which is then diffused through a specially engineered etched lens, allowing the light to spread evenly and focus over a wider area.The Orsa Multi Light Pendant is available in configurations of three or five pendants, offering flexibility to suit various room sizes and design intentions. This pendant is an ideal centerpiece for dining areas, grand entryways, or as a sophisticated sculptural element in a modern living space.
