Orsa Pendant

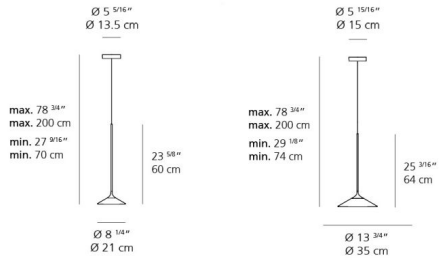

By Artemide

Description

The Orsa Pendant is the embodiment of precision, an elegant fixture pared down to its absolute essential elements to allow the light itself to express a larger volume. This minimalist masterpiece is designed for those who appreciate understated sophistication and innovative optical engineering.At its core, a slim metal stem flares out at one end to form the heat-sink and housing for the advanced LED, creating a seamless and integrated design. A UV bonded glass cover meticulously encases the light source, and its ingenious design ensures that the LED itself remains entirely invisible, making the pendant appear like a mesmerizing floating disk of pure light.The exquisite glass takes its unique shape from the focused output of the LED, which is then diffused through a specially engineered etched lens. This remarkable lens allows the light to spread evenly and focus over a wider area, creating a broad, uniform, and glare-free illumination. Available in two versatile sizes, the Orsa Pendant is an ideal choice for precise task lighting over a kitchen island, a dining table, or as a sculptural accent in any contemporary interior where refined illumination is paramount.
