Hex Light Pendant

By John Beck Steel

Description

The Hex Light Pendant is constructed of steel, then cleaned, stained and buffed by hand to create a truly unique one of a kind finish. The bulb position can be adjusted to be hidden inside or lowered and exposed, as shown. The exposed bulb adds about 2.5 inches to height. Hang multiple pendants to create a cluster effect or any design you think of. The hardwired version includes ceiling canopy and all install hardware. The plug in version includes a power cable with inline on/off switch and two ceiling hangers. The White finish includes a frosted G40 bulb, and the Ombre and Black finishes include a transparent Edison bulb. Made in the USA. Note: The Ombre finishes are not available in the plug-in version.

Shown in black ombre / transparent
