Lampe de Marseille Plug-in Wall Light By Nemo

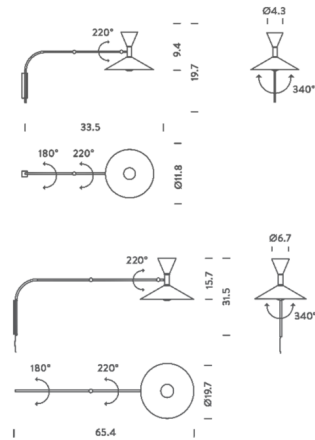

Description

The Lampe de Marseille Plug-In Wall Light was designed by Le Corbusier for his residential housing project, the Unite d'Habitation of Marseille. The hourglass shaped shade houses two bulbs to direct light both upwards and downwards. An multi-hinged arm allows the light to be aimed precisely where it is needed most, making this fixture perfectly suited for task lighting in a home office. Double switch on the cable, for on/off and adjustable light output. Note: The Lampe de Marseille Mini option can be used as a plug-in or hardwired.

Shown in whitewash
