Pipe Suspension

By Artemide

Description

The Pipe Suspension offers a whimsical yet sophisticated take on modern lighting, inviting a playful fluidity into your interior. This distinctive fixture features a highly flexible arm, encased in natural platinic (anti-yellowing) silicone, which allows for dynamic adjustments to direct light precisely where it's needed. At the end of this versatile arm rests a randomly-perforated, mirrored-aluminum reflector diffuser, expertly covered in transparent rubber-effect polycarbonate. This unique combination of materials and textures creates a captivating interplay of light and shadow, casting delightful patterns while providing effective illumination.The Pipe Suspension is more than just a light source; it's an interactive design element that encourages creativity in lighting placement. It's an ideal choice for accenting specific areas, adding a touch of contemporary whimsy over a kitchen island, or creating an intriguing visual statement in a modern living space.
