Lighting Science Group

**DESCRIPTION**

Did you know the light bulb that's been in your bedroom might be getting in the way of your body making melatonin, the hormone that helps you fall asleep? The Good Night LED light bulb, originally developed for NASA astronauts on the International Space Station, lets melatonin do its thing and helps to regulate your body's natural circadian rhythm. So when you're ready to sleep, your body is too. 8.5 watt (40 watt incandescent replacement) 120 volt A19 type E26 (medium) base, 2175K color temperature, 90+CRI, 600 lumens. Dimmable with most standard incandescent dimmers. ETL listed. Suitable for damp locations. 3 year warranty. 2.4 inch width x 4.7 inch height.

*Shown in: White*
