Mobile 13 Chandelier - Floor Model

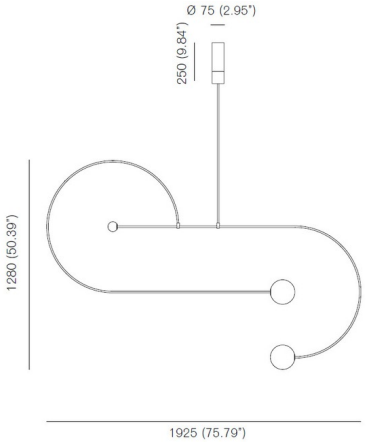

By Michael Anastassiades

Description

Mobile 13 is a delicate structure balanced in perfect equilibrium. Constructed following the principles of a mobile, it rotates freely and delicately, creating an ever-changing lighting configuration unique to the space it occupies. Each Mobile Chandelier is individually tailored to ensure the balance of its hand-crafted patinated-brass components. Every piece is unique in its dimension and compositional balance, due to the varying weight of the mouth-blown opaline glass. Includes a paintable junction box cover which will cover standard 4 inch junction boxes. The j-box cover extends beyond the fixture and will be visible.Upon ordering, please supply required overall drop length of fixture, available from 51 to 122 inches. Height is not field-adjustable. Please contact Customer Service to order. NOTE: This is a discontinued floor model and limited to quantity on hand.

Shown in black patina / opal

Specifications
