Thin-Line Indirect Wall Light By SONNEMAN - A Way of Light

Description

Sleek and minimal in form, the Thin-Line Wall Light embodies geometric architectural style and integrates beautifully into modern spaces. Use it to illuminate a range of areas including commercial settings, living rooms, bathrooms, and hallways. It is made of aluminum with an optical acrylic diffuser and can be installed horizontally, vertically, or in any other orientation. Indirect reflects light onto the wall or mounting surface for indirect illumination. Note: Thin-Line does not mount to a standard US junction box, and the included LED driver must be installed in a remote accessible location near the fixture. Driver size: 6 inch wide x 1.5 inch depth x 1 inch height.

Shown in bright satin aluminum / white acrylic
